Ritish Kumar Yadav

Kanpur, Uttar Pradesh, India | +91 771-738-8449 | yadavretishkumar05@gmail.com | linkedin.com/in/ritish-yadav24 | github.com/ritish97

Professional Summary

Data Analyst and AI/ML Engineer skilled in SQL, Python, Power BI, and Excel, with experience building end-to-end analytical pipelines, RAG-based LLM applications, and dynamic BI dashboards. Proven ability in data cleaning, ETL, customer segmentation, statistical modeling, and predictive analytics to support data-driven decision-making.

Technical Skills

- **Programming Languages:** CPP, Python
- **Data Analysis & ETL:** Data Cleaning, Data Wrangling, ETL Pipelines, EDA, Statistical Analysis, Hypothesis Testing
- **Data Visualization & BI:** Power BI, Advanced Excel, Dashboarding
- **AI / Machine Learning:** LangChain, ChromaDB, Hugging Face Sentence-Transformers, RAG, FastAPI, Predictive Modeling
- **Databases & Tools:** SQL, Git, GitHub
- **Methodologies:** RFM Segmentation, Cohort Analysis, A/B Testing, Inventory Optimization, Agile Methodologies
- **Core Subject Proficiencies:** Database Management Systems, Applied Statistics, Machine Learning Algorithms, Operating Systems, OOPS, Computer Network

Experience

Business Analyst (Part-time) | *Finlatics (Remote)* Aug 2025 – Oct 2025

- Analyzed manufacturing and consumer datasets across cross-functional projects, applying predictive maintenance and behavioral analysis techniques.

Supply Chain & Inventory Optimization | *Python, SQL, Excel, Power BI* GitHub (2025)

- Formulated Economic Order Quantity (EOQ) and safety stock algorithms in Python and SQL to optimize inventory schedules.
- Engineered SQL pipeline schemas to aggregate multi-table transactional records for automated Excel modeling.
- Designed an interactive Power BI dashboard tracking inventory KPIs, reducing holding costs by 18% and stockout risk by 22%.

Enterprise HR Workforce Attrition Analytics | *Python, SQL, Power BI, Excel* GitHub (2025)

- Processed and transformed 1,470+ employee records using Python and SQL to identify key drivers behind a 16.1% overall attrition rate.
- Calculated compensation benchmarks and statistical correlations, revealing sales representatives had the highest turnover at 39.8%.
- Designed an interactive Power BI dashboard analyzing 10+ operational departments to enable targeted HR intervention strategies.

Education Details

Vellore Institute of Technology (VIT) Sep 2023 – July 2027
Under-Graduation: Bachelor of Technology in Cyber Security and Digital Forensics CGPA: [8.26/10]
Course Type: Full-time

Kendriya vidyalaya No. 1 J.R.C – *CBSE* [2023]
Class 12th(Full-Time) PERCENTAGE : [79.2/100]

[Kendriya vidyalaya No. 1 J.R.C – *CBSE* [2021]
Class 10th(Full-Time) PERCENTAGE : [96.4/100]

Projects Undertaken

RAG-Based Document Q&A System | *FastAPI, LangChain, ChromaDB* GitHub (2026)

- Built a Retrieval-Augmented Generation (RAG) pipeline enabling LLM-powered question answering over custom document sets.
- Implemented semantic search using ChromaDB and Hugging Face sentence-transformer embeddings via a FastAPI backend.
- Deployed a working/query endpoint and benchmarked retrieval accuracy and response latency.

Instacart User Retention & RFM Analytics | *Python, SQL, Power BI, Excel* GitHub (2026)

- Cleaned and processed large-scale purchase records with Pandas and SQL to execute Recency, Frequency, and Monetary segmentation.
- Automated cohort retention pipelines in Python to monitor multi-month repeat-ordering behavior and identify drop-off points.
- Developed executive Power BI dashboards visualizing churn patterns, boosting repeat purchases by 14%.

Certifications

- Google IT Support Professional Certificate – Google / Coursera
- The Bits and Bytes of Computer Networking – Google / Coursera
- Introduction to MS Excel – Microsoft SkillUp
